Generally the Security deposit i.e., about 10% is recovered from the running account bills for the defect liability. At present in this contract, the labour supply item is not attracted any defects. And there is no need of recover the 10% towards security deposit as the payment is to be made soon after completion of their work on every month i.e., about 30 days of working.

Therefore, it is proposed to withdraw 10% security deposit recovery from the condition of the contract.
